

Business Analytics Handbook

Volume 1: Business Foundations (Project Blueprint)

This document is the foundation of a multi-volume handbook that will be developed chapter by chapter. The objective is to build a publication-quality reference for Data Analysts, Business Analysts, Product Analysts, and Analytics Engineers.

Planned Chapters

1. Welcome to Business Thinking
2. How Businesses Create Value
3. Revenue, Cost, Profit & Cash Flow
4. Business Models
5. Unit Economics
6. Financial Statements for Analysts
7. Customer Journey & Lifecycle
8. Value Chain & Competitive Advantage
9. Strategic Frameworks (Porter's Five Forces, SWOT, PESTLE)
10. KPIs, OKRs & North Star Metrics
11. Executive Decision Making
12. Volume 1 Capstone Case Study

Development Plan

Each chapter will include learning objectives, executive summary, diagrams, business examples, metrics, KPI relationships, SQL perspective, Python perspective, dashboard design ideas, executive insights, case studies, interview questions, exercises, and a mini-project. After all chapters are completed, this volume will be professionally formatted and later merged with Volumes 2–5 into a single handbook.
